

Exercise 3: Create a method to check if a number is an increasing number.

Method Name	checkNumber
Method Description	Check if a number is an increasing number
Argument	int number
Return Type	boolean
Logic	A number is said to be an increasing number if no digit is exceeded by the digit to its left. For Example: 134468 is an increasing number

Exercise 4: Create a method to check if a number is a power of two or not.

Method Name	checkNumber
Method Description	Checks if the entered number is a power of two or not
Argument	int number
Return Type	boolean
Logic	Check if the input is a power of two. Ex: 8 is a power of 2
